

# THE 2022 VINCENT J. CRISTOFALO ANNUAL LECTURESHIP

**2:30 PM**

## **Welcome**

David A. Wolk, MD  
Edward B. Lee, MD, PhD

**2:35 PM**

## **Tribute to Vincent J. Cristofalo**

Robert Pignolo, MD, PhD

**2:40 PM**

## **Introduction to 2022 Cristofalo Lecturer**

### **New discoveries in the preclinical phase of Alzheimer's**

**2:45 PM**

### **Disease: Findings from the Wisconsin Registry for Alzheimer's Prevention**

Sterling Johnson, PhD  
University of Wisconsin  
School of Medicine and Public  
Health

**3:45 PM**

## **Q&A**

**4:00 PM**

## **Event Concludes**

### **About Sterling Johnson, MD**

Dr. Johnson is a clinical neuropsychologist with research interests in brain function in Alzheimer's disease and related disorders. In the WRAP longitudinal study, he is investigating the many factors (health and lifestyle and genetics) that lead to vulnerability to cognitive decline. Central to addressing the goals of the Wisconsin Registry for Alzheimer's Prevention study, his current research focuses on Tau and amyloid imaging in people at risk for Alzheimer's disease; developing better methods for identifying cognitive decline; computer vision and machine-learning-based multimodal imaging markers of Alzheimer's disease; and enriching clinical trials and improving trial design to speed the discovery of effective treatments for Alzheimer's disease.

### **About the Vincent J. Cristofalo Lectureship**

The Vincent J. Cristofalo Annual Lectureship celebrates the spirit and continuing research of our colleague, mentor, and friend, Vincent J. Cristofalo, PhD. Dr. Cristofalo, a pioneer in research in aging, is the founder of the Center for the Study of Aging, now known as the Institute on Aging (IOA), at the University of Pennsylvania's Perelman School of Medicine.
