

NGG 588: Topics in Translational Neuroscience

Location:

Smilow Center for Translational Research (SCTR)
11th Floor - Room 11-146AB

Time: Fridays: Noon to 2:30 PM

This course will introduce graduate students in neuroscience and related disciplines to basic mechanisms and clinical features of major categories of nervous system disease. Each two-hour class will consist of two parts; a formal lecture followed by a seminar on the same topic. The formal basic science lectures will discuss genetic, molecular, and cellular mechanisms relevant to the disease examined while the seminar will illustrate how that information can be used in the clinical setting to promote further discovery and inform treatment. Some of the seminars will be associated with the Clinical Neuroscience Training Program (CNST) to provide the opportunity to interact with medical students and clinicians. The course will rely on assigned readings of primary research papers and discussions during class.

This is a weekly spring semester course consisting of two components:

- A one-hour lecture detailing the neurobiology of a particular disease
- A one-hour seminar delivered by the Clinical Neurosciences Training Program (CNST) Seminar Series
- A 30 minute discussion on the topic presented in each lecture and seminar

Participating faculty include:

- Course director Mariella De Biasi who will select weekly special lecturers and run the course
- A weekly lecturer who specializes in the disease being covered that week
- The CNST seminar speaker for that week, selected by the CNST directors Dan Wolf and Xilma Ortiz-Gonzalez

Contact Hours:

- 2.5 hours per week on Fridays
- 1CU

Activity Types:

- Lecture
- Seminar
- Small Group Discussion

Course Materials:

- Readings selected by the weekly lecturer

Prerequisites:

- Graduate-level students, senior undergraduates with permission from the Instructor
- Open to PSOM students with permission from the Department
- Priority given to NGG students, then other BGS, then other PSOM, then other Penn students on space-available basis

Student Details:

- Class size limit = 20 students
- Expected to attract second-year NGG, first or second year PGG, other PSOM students

Evaluation of Student Performance: Students will be evaluated based on their ability to identify gaps in the current knowledge for the topic presented in each class/seminar and answer questions based on readings assigned before each class or the material presented during class (40%). They will also be evaluated on a final short paper on a topic of their choice among those presented in class (40 %), and their general participation to the group discussions (20%).

01-13-2023: Introduction

12-1 PM: Mariella De Biasi, PhD, Course Director – Department of Psychiatry-
Course Introduction

1-2 PM: Jina Ko, PhD, -Departments of Bioengineering and Pathology, University of Pennsylvania School of Engineering and Applied Science
'Single Biomarker Profiling for Molecular Diagnostics'

01-20-2023: Topic 1. Neurovascular Disorders:

12-1 PM Jake Brenner, MD, PhD , Departments of Medicine & Pharmacology, PSOM

1PM-2PM: Kahlilia Morris-Blanco, PhD, Department of Cell and Developmental Biology, PSOM

01-27-2023: Topic 2. Neurodevelopment:

12-1 PM: Kimberly M. Christian, PhD, Department of Neuroscience, PSOM

1-2 PM: Morgan Botdorf, PhD, Department of Psychology, University of Pennsylvania

02-04-2023: Topic 3. Opiates/Pain:

12-1PM: Gregory Corder, PhD, Department of Psychiatry, PSOM

1-2PM: Tom Scott, MD, Department of Anesthesia and Critical Care Medicine, PSOM

02-10-2023: Topic 4. Myelination and Leukodystrophies:

12-1 PM: Judith B. Grinspan, Ph.D., Department of Neurology, Children's Hospital of Philadelphia

1-2 PM: Adeline Vanderver, M.D., Department of Neurology, Children's Hospital of Philadelphia

02-17-2023: Topic 5. Autism:

12- 1 PM: Marc Fuccillo, MD, PhD, Department of Neuroscience, PSOM

1-2 PM: Julia Parish-Morris, PhD, Department of Psychiatry, PSOM and Center for Autism Research, CHOP

02-24-2023: Topic 6. Psychopathy & Social Cognition:

12-1 PM: Rebecca Waller, PhD, Department of Psychology, University of Pennsylvania

1-2 PM: Adrianna C. Jenkins, Ph.D, Department of Psychology, University of Pennsylvania

03-03-2023: **Topic 7. Neurodegenerative Disease:**

12-1 PM Katheryn Alexandra Quilico Cousins-Gershenson, PhD, Department of Neurology, PSOM

1-2 PM: David John Irwin, MD, Department of Neurology, PSOM

03-10-2023 ***Spring Break- no class***

03-17-2023: **Topic 8. Olfaction:**

12-1PM: Joel Mainland, PhD, Monell Chemical Senses Center with NGG affiliation

1-2PM: Richard Doty, PhD, Department of Otorhinolaryngology: Head and Neck Surgery
Director, Smell and Taste Center, University of Pennsylvania Medical Center

03-24-2023: **Topic 9. Mitochondrial Dysfunction:**

12-1PM: Meagan McManus, PhD, Center for Mitochondrial and Epigenomic Medicine CHOP

1-2 PM: Douglas C. Wallace, PhD, Department of Pediatrics, Division of Human Genetics,
PSOM

03-31- 2023: **Topic 10. Sleep/Anesthesia:**

12-1 PM: Mathias Basner, PhD, Department of Psychiatry, PSOM

1-2 PM: Alexander Proekt, M.D. Ph.D., Department of Anesthesiology and Critical Care, PSOM

04-07-2023: **Topic 11. Traumatic Brain Injury:**

12-1PM: Akiva Cohen, PhD, Department of Anesthesiology and Critical Care, PSOM

1-2 PM: Andrea L.C. Schneider, MD, PhD, Department of Neurology, Division of Neurocritical
Care and Department of Epidemiology, Biostatistics, and Informatics, PSOM

04-14-2023: **Topic 12. TBD**

04-21-2023: **Topic 13. Epilepsy:**

12-1PM: J Ethan Goldberg, MD, PhD, Department Neurology, PSOM

1-2 PM: Ingo Helbig, MD, Departments of Neurology and Pediatrics, PSOM and
Division of Neurology, CHOP
