GrantMonitor.rep

Noncompeting Continuations Due (Does Not Include Subcontracts)

Funds are flagged whose current budget end is greater than or equal to today's date plus 4 months . In order to cover all NIH funds (including those such as U's where account end is sent equal to the current budget end even though there may be other years due), all possible due dates are returned. When the noncompeting continuation is due at NIH, a flag will appear for those funds where current budget end =account end noting that a "NCC may not be due." Otherwise the flag reads "NCC Probably Due." When the current budget end is less than today and does not equal the account end, the flag reads "Award Due?", reminding the user than an expected award has not yet

Org: 4100 to 4100

Fund	Fund Desc	PI Name	Org	Acct Start	Current Budget End	Account End	Due at NIH	Funds to Check

This tab of the GrantMonitor can help identify NIH noncompeting Progress Reports that Might be due. There are also separate tabs which can identify when Subcontracts Progress Reports are due and also T32's based on which Institute the award is with.
